PUNKS

vibe with humans  
sticker/swag exchange  
diy demos and talks

This is for the hacker punks...  
the ones who break to make better...  
who write zines and zero-days...  
who still question the answers...  
who DIYed before it was downloadable...

This isn't nostalgia...  
...it's defiance with better tools

We didn't outgrow we upgraded

we've got a lot of questions  
we've got a lot to learn  
so tired of solving problems  
too many bridges burned
